### ABOUT

The Flow chair is truly great thanks to its flawless design. The sophisticated design lovers will appreciate the construction of Flow where no screws or metal joints were used. The chairs are slim, elegant and extremely light both in terms of looks and in terms of weight. The minimalist Flow chair does not contain unnecessary details. The excellent backrest angle and height fit every back and it is the main gratification of the Flow design that will be felt by anyone who tries the chair.

The clean look of the chair, timeless design and excellent sitting comfort make it suitable for the widest spectrum of public and private interiors as restaurants, museums, libraries, churches, halls, waiting areas, meeting areas and conference rooms. This wooden chair with a stable frame is made of bent plywood with variable thickness in the curves. Due to the stackability of these wooden chairs (up to 10 pcs.), they are easier to keep and move.
