### ABOUT

The Svan baby high chair is made of natural material – wood which makes it especially stable and resistant. A significant advantage of this baby chair is the functionality and several adjustment options. The Svan baby high chair has an adjustable seat height and depth, foothold height and depth; it also has seat belts for the safety of the youngest. The front part of the seat can be removed together with the tray.

The tray has two positions – in the front when it is needed for feeding the baby and behind when the chair needs to be placed at the (dining) table. The tray has a removable plastic surface which can be washed under water. The milling in the backrest of the chair can be used as a handle that makes moving and carrying the chair easier.

Thanks to the compact design, the chair takes up little space and is easy to clean. The adjustment options of the chair let it be used until the age of 7.
